### Introduction

### The information in this report is confidential. So keep this report in a safe place!

This report is based on the assessment with the Bridge Personality. In this assessment, candidates are asked 240 questions, in which they assess themselves in a work situation. Why was this formulation chosen? Because years of research have shown that the self-image is a good guideline for future employment behaviour. Besides information about employment behaviour, the Bridge Personality provides insight into the personality. It also makes clear in which environment candidates function well, or not so well.

The final results contain both normative and ipsative scores. Normative means that a candidate scores on a scale of 1 to 9 (1=very strong disagreement, 9=very strong agreement). Ipsative stands for 'forced choice' and means that candidates have to put questions in order (1=least applicable to me, 6=most applicable to me).

Why this combination of scores? Because research within the test research has shown that combining these scores gives the best result in indicating personality and preferences for behaviour. The combined score, or sten score, goes from 1 to 10. If the normative score deviates by more than 3 stens from the ipsative score, we indicate this by this symbol:

The results are compared to those of a norm group of 500 people who filled in this instrument earlier. A score from 1 to 10 is given for each dimension. The Bridge Personality is particularly suited to candidates within a working environment. As working environments are dynamic, we recommend using the instrument again after a period of two years.

This report has been electronically compiled and produced by the software system of TestGroup Consulting. It provides information about the person who has filled in the test. TestGroup Consulting accepts no responsibility for problems that may arise from using this report. The Bridge Personality and all the other tests of TestGroup Consulting, as well as the reports, may only be used by employees of TestGroup Consulting, representatives or resellers of TestGroup Consulting, or clients of TestGroup Consulting who are authorised and trained to do so.

### Bridge Answer Behaviour

#### 2 3 4 5 6 7 8 9 10

#### Social desirability

A high score on social desirability indicates that someone is inclined to agree strongly with propositions for which it is socially desirable to agree strongly. An example of such a proposition is: 'I know almost nobody who is as reliable and hard-working as I am'. A high score on such a question is socially desirable, but is maybe not the truth.

#### **Correspondence Normative-Ipsative**

If the normative and ipsative scores are very far apart, there may be various reasons for this. If the ipsative score is much higher than the normative score, the person concerned is probably self-critical to a more than average degree. If a candidate scores higher on a normative score than an ipsative score, then he or she may be self-critical to a less than average degree. It is also possible that the person concerned has overestimated himself/herself in the normative section.

#### Acquiescence

Acquiescence indicates the degree in which a respondent answers questions with 'yes' A high score on agreement answers indicates a high score on all the normative questions (1= very strong disagreement, 9= very strong agreement). A high score here, therefore, shows that someone agrees strongly with almost every proposition and thus with each underlying dimension. This means they are actually in agreement with everything.

# Bridge Dimension Overview - Output

Bridge Dimension Overview - Output	
DISPOSITION	1 2 3 4 5 6 7 8 9 10
Methodical not organised; does not like planning; bad at setting priorities	
<b>Integrity</b> fairly focused on meeting commitments; attaches a reasonable amount of value to honesty and reliability; fairly focused on dealing confidentially with information	
Action focused works at a fairly fast pace; likes pressure now and again; is fairly good at doing several things at once	
DRIVE	1 2 3 4 5 6 7 8 9 10
<b>Initiative</b> fairly proactive; does not mind starting something new; sometimes starts something before being ask	
Career focused has average ambition; is fairly career-minded; is competitive now and again	
<b>Enterprising</b> quite likes taking on new challenges; spots opportunities in the market fairly quickly; is a good salesperson	
IMPLEMENTATION	1 2 3 4 5 6 7 8 9 10
Detail focused does not work carefully; pays little attention to details in information; does not like working in an environment where details are important	
Results focused perseveres in difficult situations less than most people; less goal-oriented than most people; finds it more difficult to achieve results than most people	
Aware of rules does not like working in an organisation with a lot of bureaucracy and rules; does not keep to rules and regulations; is not considered rule-conscious	

# Bridge Dimension Overview - Attitude

Bridge Dimension Overview - Attitude	
SOCIAL CONTACT	1 2 3 4 5 6 7 8 9 10
<b>Cooperative</b> finds working in a team very important; does not like working alone; always involves colleagues with his or her work	
Helpful spends more time helping people with problems than most people; has an above average focus on helping colleagues when necessary; is considered helpful by others	
<b>Considerate</b> is concerned with other people; likes listening to others; is interested in other people's motives	
RESILIENCE	1 2 3 4 5 6 7 8 9 10
Avoiding conflict adapts his or her views to a situation or person; is considered more compliant than most people; adapts his/her behaviour more often than most people	•••••
Self-confident has a reasonable amount of self-confidence; has average control over his or her own future; fairly satisfied with himself or herself and would like to change few personal traits	
Stress resistant copes with stress less well; stays less calm than most people under high pressure of work; often worries about things at work	
FLEXIBILITY	1 2 3 4 5 6 7 8 9 10
<b>Openness to feedback (NOP)</b> is open to feedback from others now and again; asks the advice of others to a reasonable extent; makes average use of feedback to improve performance	
<b>Positive attitude</b> has a fairly positive view of things; a fairly cheerful person; has average difficulty dealing with setbacks	
Change oriented really likes taking on a new challenge; accepts a lot of changes in life; can deal very well with unsettled times	

times

### Bridge Dimension Overview - Inspiration

Bridge Billension overview Inspiration	
PERCEPTION	1 2 3 4 5 6 7 8 9 10
<b>Creative</b> comes up with new ideas very often; has original ideas very often; often looks for a radical solution to a problem	
Abstract Is better at developing concepts than most people; Applies more theories than most people; Is interested in studying underlying principles	
Strategic () is inclined to develop strategies; is inclined to develop a vision for the future; fairly focused on the long term	
OPINION	1 2 3 4 5 6 7 8 9 10
<b>Insight</b> gets to the heart of a problem fairly quickly; identifies ways of improving something now and again; uses intuition to make a judgement fairly often	
<b>Practical</b> more focused on practical work than most people; finds it fairly easy to learn by doing; usually regarded by others as a practical type	
Inquiring is interested in learning new things; has a preference for learning through reading; learns quickly	
EVALUATION	1 2 3 4 5 6 7 8 9 10
Analytical is less enthusiastic about looking for solutions to problems than most people; is less interested in analysing information than most people; searches for information less actively than most people	

### Rational

does not like working with figures; does not base a decision on a detailed technical analysis; not focused on working with objective facts

## The 16 Jung Types

The 16 Jung Types are based on the personality theory of the Swiss psychiatrist Carl Gustav Jung. His 'Type Theory' theory addresses normal differences between healthy people. Jung came to the conclusion that people have an innate preference to behave in a certain way. This theory is known as the 'Type Theory' and describes personality in 16 types. A Jung Type says something about the behavior that someone naturally shows and which takes and little energy. In practice, someone can also behave in a different way, but that behavior generally requires more effort. In this report you will find a brief description of the Jung Types please use: 'The Bridge Personality, the booklet for consult candidates'.

### The Jung Type of Anne Example

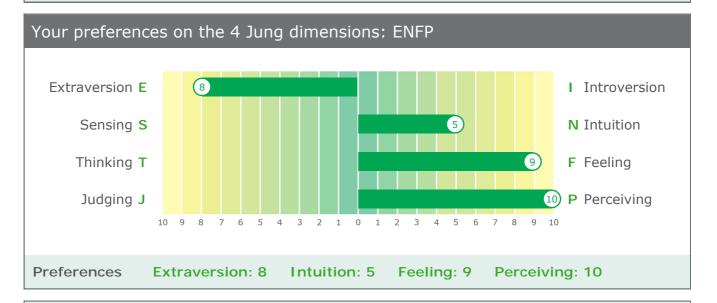

A Jung Type consists of four letters, these letters are determined on the basis of the provided answers in The Bridge Personality. Each letter represents an abbreviation of a preference on 4 dimensions. So there are 8 possible preferences. When the eight preferences are combined in every possible way, the 16 Jung types emerge. The Jung Type is shown below.

### The 4 Jung dimensions: ENFP

things are

The clarity of your preference is shown below in sten scores ranging from 1 to 10. Sten scores are calculated by comparing your scores to a norm group of 500 people. Are you right in the middle? Then your preference is not clear.

Keep in mind that your current work or private situation may influence the clarity of your preferences. So think carefully about whether the above Jung Type suits you well. You can use The Bridge Personality: The Candidate Booklet to learn more about Jung Types and find out which Jung Type is best for you.

The Jung Type of Ar	nne Example: Inspirer
	Are warm, enthusiastic and often charismatic and encouraging. They enjoy being innovative and creative, and motivating others to take action or teaching them new things. They look for a lot of confirmation from others, but are also quick to give support and compliments themselves. They are spontaneous and flexible, and will rely on their talent for improvisation and verbal skills. They are quick to make connections between events and information, and are characterised by their imagination.
Communication	They take notice of everyone's opinions and respond positively to them. They talk enthusiastically about values and new opportunities, as well as about general matters. They can sometimes talk a lot and come up with many new ideas. They sometimes try to convince others before they have investigated the rational basis (facts and details) of a plan. They could improve their communicative skills by talking less and trying harder to analyse the information first.
Management Style	They are democratic managers who ask for everyone's opinion and will negotiate the differences, if necessary. They will assume the role of spokesman in discussions about ideas that concern people. They can sometimes promise more to employees than is possible. They do not focus on giving specific instructions to employees. They look for a role for each team member and do not like it if employees are left out. They could improve their management skills by setting more priorities in projects or situations. They could also try saying no occasionally.
Conflict Management	They ensure that people are involved in the process of problem-solving or decision-making. They are flexible in solving problems, and use their imagination in finding a solution. They remain open to different solutions for a long time, and a decision may therefore be postponed for a while. They take less account of the details in problem-solving. They do not like a black-and-white approach and also have a balanced solution for the greater whole. They could improve their approach by trying to speed up decision-making in the process of problem-solving.
Stress	In stressful situations, they try to introduce enthusiasm and spontaneity into the group. They will try to keep colleagues motivated by allowing them to do different things. They can take greater risks under stress. They could improve their stress management by studying the details and facts well, in order to gain a good picture of the situation. They could also try to be selective in the work they take on and not try to do everything.

### Bridge Colour - Scores

The Bridge Colour reports your preferences in 4 colours. Your scores on these colours are calculated based on your Jung preferences on page 11 of this report. The colours are: Red, Yellow, Green and Blue. We all use these colours to a certain amount, but you will always have a preference for 1 colour. The order and the level of the scores on the 4 colours determine our preferred behavior. A preference for a colour is and indication of the way you think, work and communicate.

As described, everyone has a preference for all 4 colours to a certain amount, however you will have a dominant colour. That being said, you are not just one colour. As an example, on a stressful day, you may use a different colour than your dominant colour. The way you feel can influence the traits that you use on that day. Your surroundings can also influence the way you feel and thus influence the colour that you will use. You may also have a preference for a different colour at work than you have at home.

On this page you will find your score on the 4 colours:

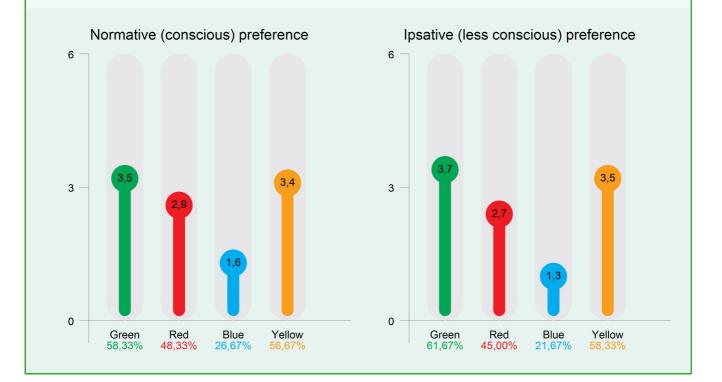

- 🛑 Red: ambitious, focused, decisive, goal oriented, dominant and focus on business
- Yellow: friendly, focus on people, enthusiastic, open, dynamic, creative and interactive
- Green: focus on people, loyal, empathic, caring, patient, focus on harmony
- Blue: focus on details and planning, factual, objective, analysis, formal, focus on tasks

The Bridge Colour calculates, based on your normative answers (1 to 9), your Normative (intentional) colour preference and based on your Ipsative answers (most/least) your Ipsative (less intentional) colour preference.

Normative (intentional) preference: describes how you want to be. A combination of who you are, who you want to be and what your surroundings demand of you.

Ipsative (less intentional) preference: describes your less intentional, more instinctive preference when you are not being influenced by your interaction with others.

Your colour preference(s) that have a score of 3 or higher on you can use easily, while colours with a score lower than 3 will require more energy.

### Bridge Colour Wheel: 72 preferences

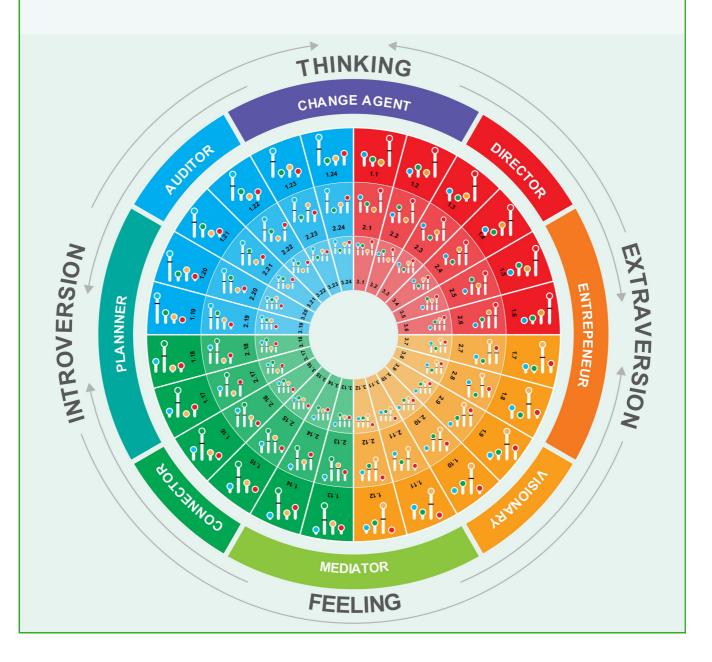

By linking the Thinking and Feeling preferences with Extraversion and Introversion, eight preferred types are created in the color wheel.

Next, three rings are applied, so that ultimately 72 subtypes are created. The combination of color preferences determines the location in the color wheel. Every type has a unique order of colour preference. The exact position in the wheel is dependent on this order.

- Inner ring three colors above the centerline
- Middle ring two colors above the centerline
- Outer ring a color above the centerline

It is also possible to have preferences on more than one ring in the wheel. This occurs when your Conscious (Normative) preference and your Less Conscious (Ipsative) preference are different.

Is it not possible to have a preference for all four colours. There is always at least one colour that will be more difficult for you. However, also that the behaviour that belongs to that colour will be achievable for you, when you put more effort and energy into it.

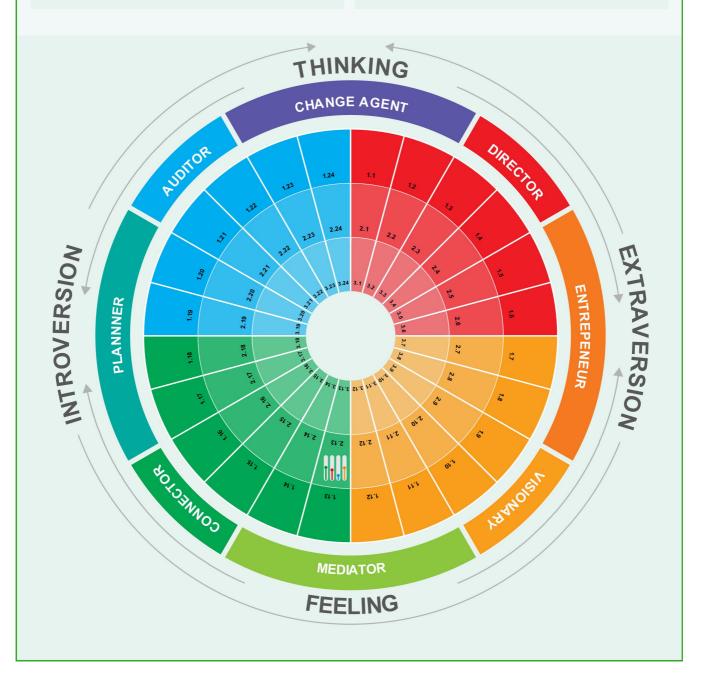

### Bridge Colour - Colour Wheel

On this page your Conscious (Normative) and Less Conscious (Ipsative) wheel positions are displayed. Please note that these positions can differ.

The Bridge Colour Wheel has 8 types. By applying three levels in the wheel, a further differentiation of 72 types is created. Your combination of preferred colours will determine your position in the colour wheel.

# **Conscious Wheel Position** 2.13 : Connecting mediator

Less Conscious Wheel Position 2.13 : Connecting mediator

# Bridge Competency Profile

This is an overview of Anne Example's potential on eight commonly used competencies in organizations, schools and universities to indicate potential and performance.

COMPETENCY	1 2 3 4 5 6 7 8 9 10	COMPETENCE
Support others (Cooperative, Helpful, Considerate, Coaching)		Highest score possible
Relationship management (Networking, Sociable, Socially bold, Considerate)		Highest score possible
Innovating (Creative, Change oriented, Initiative)	•••••••	More than capable
Adapting to change (Positive attitude, Change oriented, Openness to feedback)	•••••	Capable
<b>Communication focused</b> (Networking, Sociable, Openness to feedback, Convincing)	•••••	Capable
Inspiring others (Convincing, Socially bold, Guiding)	••••••	Above average
<b>Managing</b> (Decisive, Guiding, Coaching, Socially bold)	••••••	Above average
Achieving goals (Results focused, Career focused, Initiative)	••••5••••	Below average
